Appnote PAA-MAX9788-01 Amplifier

Designed on a printed circuits board of only 2,31 cm², the "Max9788" piezo audio amplifier of Maxim fulfils the needs of very small designs in portable applications. A maximum output of 20Vpp and very low power consumption makes it even more attractive.

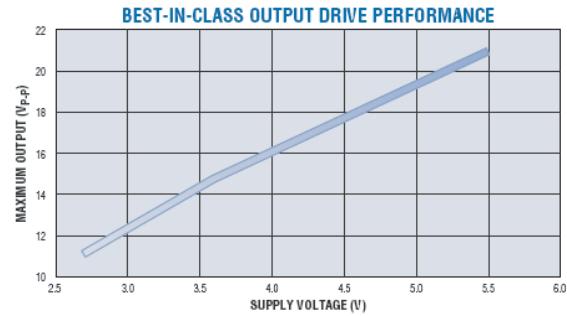

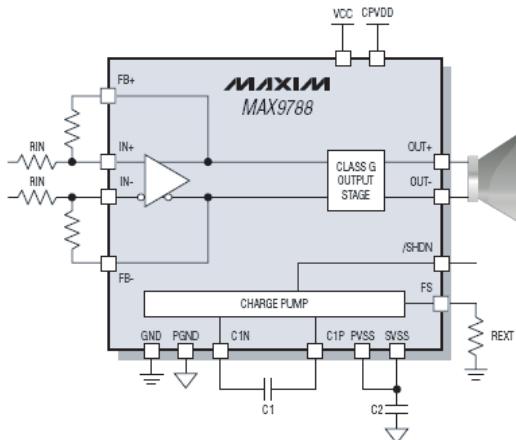

Specifications:

- Integrated charge pump power supply Fixed amplification ratio: +/- 80
- Class G Amplifier Voltage input: 5 V
- Fully differential inputs and outputs
- Capacitive load up to 1µF
- 15 components

Specifications:

The MAX9788's Class G technology can deliver up to 20Vpp, ideal for driving ultra-thin piezoelectric and ceramic speakers, for portable applications such as cell phones, smartphones, and portable media players.

MAX9788
14Vp.p, Class G Ceramic Speaker Driver

General Description
The MAX9788 features a mono Class G power amplifier with integrated charge-pump power supply. This device is specifically designed to drive the high capacitance of a ceramic loudspeaker. The charge pump can supply a maximum current of 1.5A, which is enough to drive a speaker, guaranteeing an output of 14Vp.p.

The MAX9788 maximizes efficiency by offering high performance efficiency. Maxim's proprietary Class G output stage allows the MAX9788 to achieve better efficiency than Class AB devices without the EMI penalties commonly associated with Class AB designs.

The MAX9788 is ideally suited to deliver the high output voltage swing required to drive ceramic/piezoelectric speakers.

The device utilizes fully differential inputs and outputs, comprising two 14Vp.p single-ended outputs, one common-mode output, and one ground output.

The MAX9788 is fully specified over the -40°C to +85°C extended temperature range and is available in a 4mm x 4mm 28-Bump WLP package or a 4mm x 4mm 28-Pin TQFN package.

Features

- Integrated Charge-Pump Power Supply—No Inductor Required
- 14Vp.p Single-Ended Output
- 3.2V to 5.5V Single-Supply Operation
- Clickless/Popless Operation
- Small Thermally Efficient Packages
- 4mm x 4mm 28-Bump WLP
- 3mm x 3.5mm 28-Pin TQFN

Ordering Information

PART	PN PACKAGE	TEMP RANGE
MAX9788EP-TSOP	TSOP-EP	-40°C to +85°C
MAX9788T-TQFN	TQFN	-40°C to +85°C

Applications

- Cell Phones
- Personal Media Players
- Handheld Gaming
- Consoles
- Notebook Computers

values: $C = 68 \text{ nF}$, $R_{FB} = 200\text{K}$, $R_{IN} = 10\text{K}$
 $Av = 20 \log(80) = +38 \text{ dB}$

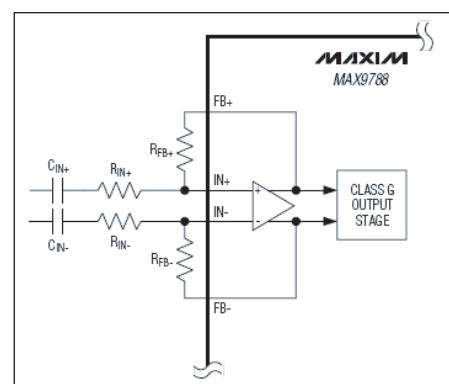

More information regarding the IC MAX9788 can you find on the website <http://www.maxim-ic.com> and in the datasheet:

<http://datasheets.maxim-ic.com/en/ds/MAX9788.pdf>

Amplification settings are done by the resistors R_{IN} and R_F

$$A_V = 20 \log \left[4 \times \left(\frac{R_{FB-}}{R_{IN-}} \right) \right] (\text{dB})$$

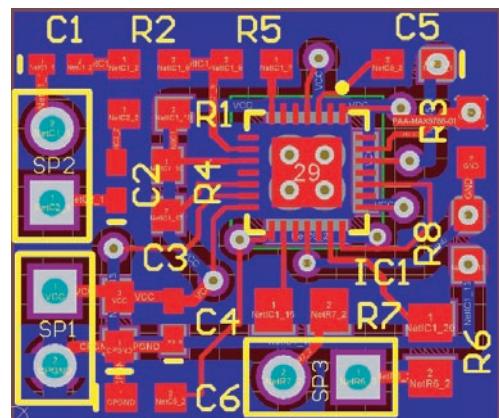

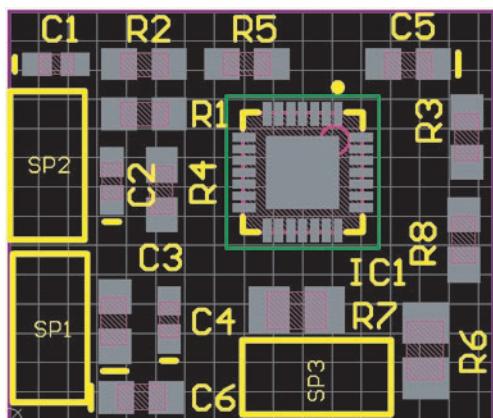

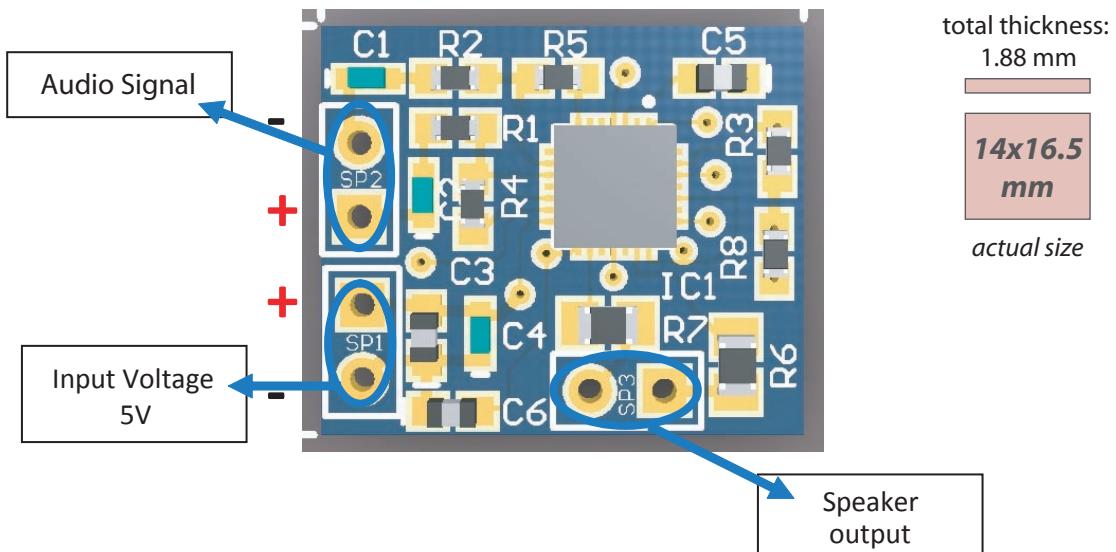

$$\frac{R_{FB+}}{R_{IN+}} = \frac{R_{FB-}}{R_{IN-}} \quad \text{and} \quad C_{IN+} = C_{IN-}$$

Overview Specifications:

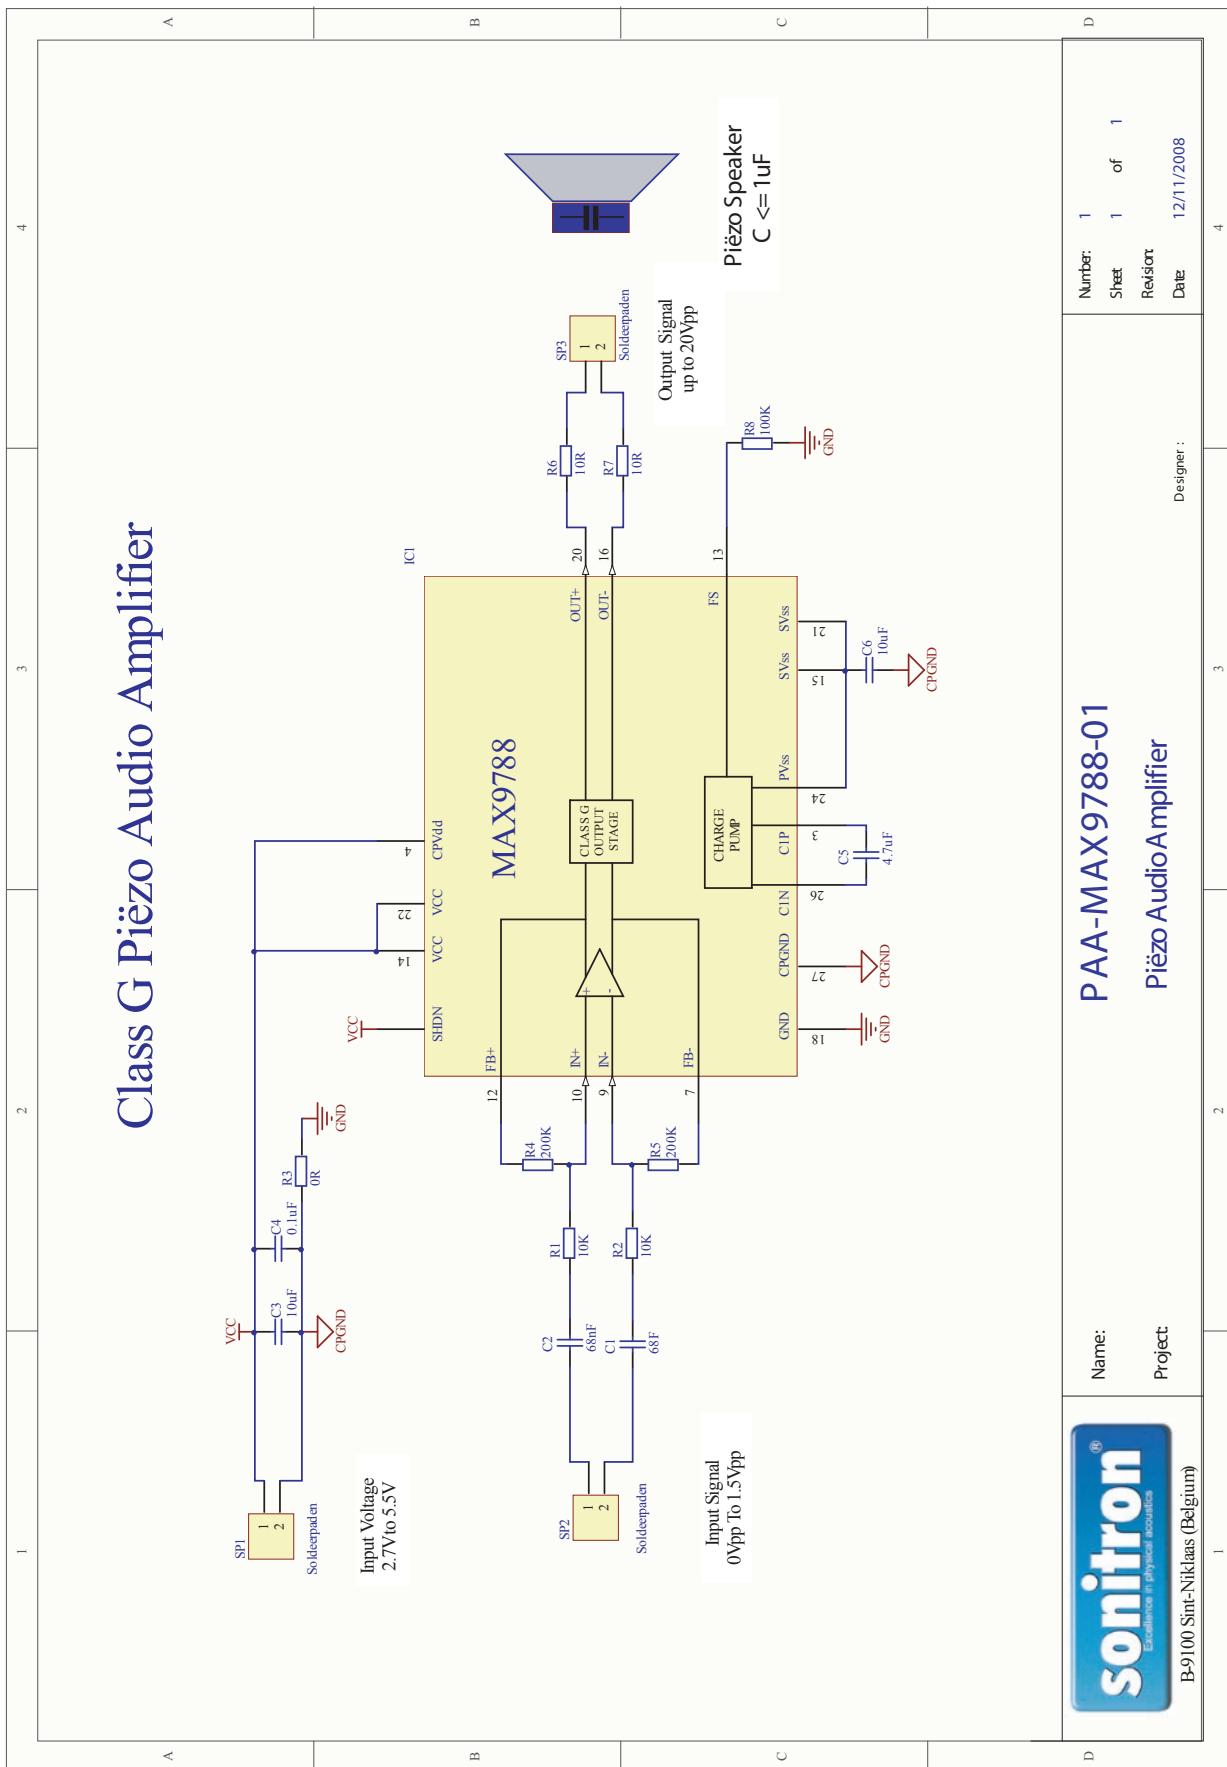

- Class G amplifier to drive a bridge -tied-load (BTL)
- Input Voltage : 5V (stable)
- Input Audio Signal: 0V To 1Vpp
- Output Audio Signal: Max 20Vpp
- Capacitive load up to 1μF

Class G Piëzo Audio Amplifier

PIEZO AUDIO AMPLIFIERS

INTRODUCTION

The **Piezo Audio Amplifiers**-series are a total solution to drive piezoceramic sound components. A range of different PCB sizes, amplifier topologies and maximum voltage peak to peak outputs, cover a wide solution to piezo audio amplification.

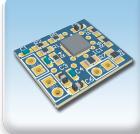

Piezo audio amplifiers are designed to handle capacitive loads and have the possibility to deliver large voltages peak to peak over the complete audio frequency range.

The heart of a piezo audio component is a ceramic piezo stone that interacts when it feels a certain voltage difference. An increase of a voltage peak to peak will have a larger piezo deformation and results in a larger sound output.

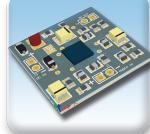

The PAA-series give a quality amplifier solution where a quality sound is needed.

GENERAL OVERVIEW PAA SERIES

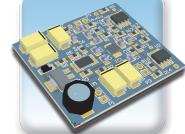

Model	PAA-MAX9788-01	PAA-LM4960-02	PAA-StepUpBTL-01
Measurements PCB(mm)	14x16.5mm	25x25mm	40x35mm
Voltage input (V)	5V	5V	5V-25V
MAX Capacitance Piezo Speaker	1µF	600nF	1µF
Max Voltage Output Vpp	20Vpp	24Vpp	60Vpp
Voltage Topology	Integrated step up converter	Integrated step up converter	Step up converter
Amplifier classification	Class G	Class AB	Class AB
Used amplifier configuration	Fully Differential	Bridge Tied Load	Bridge Tied Load
Average current consumption of speaker and amplifier (mA)	15mA	85mA	40mA-400mA (2 Watt)
